Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over MIZUTA 5,828,892 in view of NELSON EP1107437A2.

Regarding claim 24.

MIZUTA discloses a method of providing a supply voltage comprising: providing a plurality of source input voltages; monitoring the source voltage; generating a control signal responsive to the source voltage being above a given level; a response to the control signal, providing a working voltage from the source voltage (col.2, lines 1-12); converting (23) the working voltage to a supply voltage.

MIZUTA does not disclose ORing the source input voltages providing a source voltage.

NELSON teaches an output power bus defined by the first diode output coupled to the second diode output is provided (providing the ORing function of to source inputs).

It would have been obvious to one having ordinary skill in the art at the time of this invention to have modified the power supply control circuit to include a first diode and a second diode to accept power from independent power sources to supply power

to the output power bus upon the loss of the first isolated power source or the loss of the second isolated power source (NELSON, abstract).

Allowable Subject Matter

Claims 1-23,25 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not disclose or suggest, inter alia", the standby converter coupled to the OR circuit output that provides a voltage, to the control circuit, responsive to a sufficient source voltage at the OR circuit output.
